

January 14, 2010

In order to meet the increasing need for small pull-type harvesters, we are pleased to announce that we are now able to arrange for the refurbishment and delivery of All-Crop Harvesters to customers in the continental U.S.

Each machine will be overhauled to your specifications and budgetary constraints. Depending on availability, a model 66 or 72 can be overhauled to "field ready" condition, or as a "like new" machine. Additionally, improvements to the harvesters are under development and will be offered as they become available.

Current lead time is between four and six months.

Please contact us for further details

Thanks,

Yaz-AllCrop
